Sustainability Leadership

Graduate Certificate Program

**An opportunity
for personal
and professional
transformation**

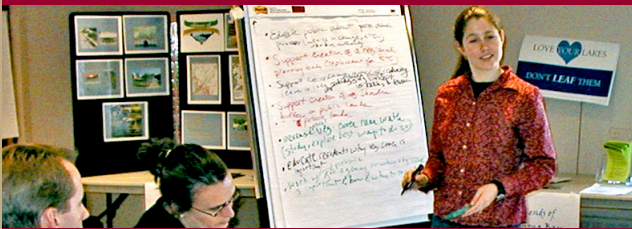

EDGEWOOD COLLEGE

Make a DIFFERENCE

The Sustainability Leadership Graduate Certificate Program at Edgewood College serves those who recognize the urgent call to create a more ecologically, economically, and socially sustainable culture. As a student in the program, you will develop the transformative ethical leadership skills needed to successfully apply the principles of sustainability for positive change, for yourself and your community. You'll gain practical knowledge in ecological design, community participation, social change, and social justice and apply it toward the regeneration of nature's capacity for providing health and prosperity.

Lead the CHANGE

The Sustainability Leadership curriculum is project based. You'll address real-world issues related to your interests and professional goals. You'll also build a network of relationships with your program colleagues and mentors, community leaders, and other experts in sustainability. The knowledge and skills you'll acquire can be put to immediate use in your life and your business, school, organization, or community.

Program HIGHLIGHTS

- Interdisciplinary, real-world approach framed by three aspects of sustainability: environmental quality, social justice, and economic vitality.
- Cohort-based program that brings together students from a wide variety of backgrounds and experiences, to create a rich and diverse community of learners.
- Classes scheduled to accommodate working professionals and designed to meet the needs of adult learners.
- Unique structure including an initial week-long living/learning immersion experience, cooperative group projects, bimonthly Saturday classes during the academic year, and an individual integrative sustainability project for your organization or community.
- Courses led by highly qualified Edgewood College faculty and key community partners.

"I'm looking forward to the opportunity to learn and grow through this program, both personally and in helping lead the efforts of the sustainability team at American Family Insurance. The practical, applied approach and interdisciplinary nature of the curriculum will allow me to bring innovative and transformational ideas to my work from day one to the final capstone project."

-- LeeAnn Glover, American Family Insurance

Realize New POSSIBILITIES

If you are enthusiastic about becoming a change agent for sustainability, this program will feed your passion. The Sustainability Leadership Program is ideal for adult professionals working in a wide range of fields, including nonprofit and corporate management, economic development, education, government, facilities operations, public health, energy and utilities, regional planning and design, hospitality, religious service, and law.

About EDGEWOOD COLLEGE

A commitment to environmental stewardship, social justice, and sustainability resonates deeply at Edgewood College. We are uniquely suited to provide the Sustainability Leadership Program because of our strong grounding in the liberal arts and in the community, and because of our Dominican heritage. All Edgewood programs are grounded in the Dominican values of Community, Partnership, Justice, Compassion, and Truth.
